Question 27. Read the passage and answer the questions. (5 × 1 = 5)

We all know the common housefly too well; for at certain times of the year, especially in the hot weather, flies are a perfect nuisance. They come into our houses in great numbers, especially at meal times and they buzz about, and tickle us by crawling over our faces. We flip them away, and kill a few, but still more come to worry us. For they seem to have no fear and the only way to stop their teasing is to kill them.

But flies are not only troublesome; they are really dangerous. They can give us certain diseases, especially enteric. For flies not only eat clean things like fruit, but also all kinds of rotten stuff, like manure, rotting vegetables and filthy stuff in drains. Their feet are so made that they carry away with them particles of these putrid things. Then they come and sit on the sweetmeats and fruit and cakes in the bazaar shops and crawl over them with their dirty legs leaving all kinds of disease germs on the food that people will eat.

- (a) Why are the houseflies described as 'a perfect nuisance'?
- (i) They annoy us ☐
- (ii) They sometimes spoil the food we eat. ☐
- (iii) They can cause diseases. ☐ (iv) all of these ☐
- (b) What is the only way to get rid of them?
- (i) by flipping them away ☐ (ii) by killing them ☐
- (iii) by preventing them from coming to our houses in large numbers ☐
- (iv) none of these ☐
- (c) How can houseflies cause diseases? Houseflies can cause diseases by ____
- (i) their eating clean food ☐
- (ii) their eating rotten stuff like manure ☐
- (iii) eating rotten vegetables ☐
- (iv) their feet carrying particles of dirty stuff ☐
- and leaving the disease germs on the food ☐
- (d) Fill in the blank suitably.
The housefly is the _____ agent in transmitting diseases.
- (i) most familiar ☐ (ii) least known ☐
- (iii) least dangerous ☐ (iv) most useful ☐
- (e) An antonym for the word 'rotten' is
- (i) pleasant ☐ (ii) fresh ☐ (iii) impure ☐ (iv) unused ☐
